PROFESSIONAL SUMMARY

Senior Android Developer with 5+ years of experience building enterprise-grade mobile solutions for Fortune 500 clients including VMO2, Telefonica, UltraTech, and Cognizant. Expert in Android SDK development, Jetpack Compose, Kotlin, and modern architecture patterns (MVVM, Clean Architecture). Proven track record in telecom domain with carrier-level integrations, VoLTE implementation, and performance optimization. Strong collaborator with global cross-functional teams delivering scalable, high-quality applications.

PROFESSIONAL EXPERIENCE

ACL Digital, Pune

Senior Software Developer

June 2025 – Present

Ookla Android SDK | VMO2 & Telefonica Telecom Solutions

- Leading Android SDK development for VMO2 (UK) and Telefonica (Europe) carrier-branded applications serving millions of subscribers
- Architected production-ready SDK modules using Jetpack Compose and Kotlin with improved UI performance and developer experience
- Implemented advanced network diagnostics including 5G speed testing, latency measurement, jitter analysis, and packet loss detection
- Optimized SDK performance reducing memory footprint and battery consumption through efficient coroutine management
- Deployed across 8 international markets with high crash-free rate and exceptional client satisfaction
- Mentored junior developers on Jetpack Compose best practices and modern Android architecture patterns

Technologies: Kotlin, Jetpack Compose, MVVM, Clean Architecture, Hilt, Retrofit, Coroutines, Flow, WorkManager

BirlaSoft Limited, Pune

Sr Software Developer

July 2022 – May 2025

UltraTech Trade Connect

- Led development of PlaceOrder Multi Retailer Module, Finance Section, and Retailer Sales for India's leading cement company
- Architected DeviceExclusionManager for O2 UK enabling intelligent VoLTE configuration with device-specific handling
- Developed Samsung custom IMS detection system using Content Providers for seamless telephony integration
- Resolved critical ANR issues through StrictMode optimization and background threading improving app launch performance
- Implemented comprehensive telemetry system for carrier configuration tracking and VoLTE enablement monitoring
- Delivered multiple major releases with high client satisfaction and zero critical production bugs

Technologies: Kotlin, Java, Firebase, AWS Amplify, Carrier Config Service, IMS Provider, TelephonyManager, Retrofit, MySQL

Cognizant Technology Solutions, Pune

Programmer Analyst

October 2020 – June 2022

NGIN Platform - Life Insurance & Annuity (ULIP Product - India)

- Designed and implemented policy management features improving claim processing efficiency for BALIC client
- Led integration and testing phases ensuring seamless application functionality across Android and web platforms
- Developed responsive UI components using React and Java ensuring cross-platform compatibility

Technologies: Java, React, JavaScript, SQL, Firebase, Retrofit

TECHNICAL SKILLS

Languages: Kotlin, Java, JavaScript, C#

Modern Android: Jetpack Compose, Material Design, ViewModel, LiveData, Flow

Architecture: MVVM, MVI, Clean Architecture, Repository Pattern

DI & Async: Hilt, Koin, Dagger, Coroutines, RxJava, WorkManager

Networking: Retrofit, OkHttp, Ktor, WebSocket, RESTful APIs

Database: Room, SQLite, MySQL, MS SQL Server, Realm

Telecom: Carrier Config, IMS Provider, TelephonyManager, APN Config

Cloud & Tools: Firebase, AWS Amplify, Git, Android Studio, Postman

Testing: JUnit, Espresso, MockK, Compose UI Testing

EDUCATION

B. Tech in Computer Science, SKIT College, Jaipur

2016 – 2020

CERTIFICATIONS

- Infosys Certified Software Programmer
- Coursera Full Stack Web Development
- Microsoft Azure Fundamentals (AZ-900)
